A Team of Professional, Qualified Electricians—Right When You Need Them Most

From weather damage to equipment malfunctions to unplanned expansions, even the most thorough preventive maintenance schedule doesn't account for every electrical service your building requires.

That's why Forest Electric New Jersey (Forest NJ) pairs our preventive programs with a services/special projects team ready to respond at a moment's notice. When small construction projects arise—like fixing an outlet, troubleshooting a generator, or retrofitting a small area or office space—we are ready to help.

24/7/365 Service— Keeping Emergencies from Becoming Catastrophes

We have a team of highly trained and certified electricians, familiar with a wide range of electrical systems, equipment, and telecommunications infrastructure. They are backed by a fleet of fully equipped service vans ready to respond rapidly to emergency projects across the region.
