From the Board Room to the Conference Hall to the Recording Studio—Custom AV Solutions for Every Need

Featuring cutting-edge equipment and technologies, Forest Electric New Jersey (Forest NJ) provides a full range of audio/visual (AV) installation and design services. We can custom design AV systems according to the unique needs of your office space or facility, handling everything from wiring and cabling to equipment layout and installation.

Expert Installation from Audio/Visual Professionals

We have extensive specialty expertise in AV systems, including knowledge kiosks, digital signage, video conferencing, paging, and sound masking systems for commercial offices, board/conference rooms, broadcast studios, and more. Our team also includes automation and controls professionals capable of handling general office automation, as well as automation in large indoor and outdoor gathering spaces.

And, at Forest NJ, we go the extra mile, providing value-added services like equipment testing and troubleshooting, inventory management, layout confirmation, and more.
