Expansive Construction Services from Industry Leaders

Forest Electric New Jersey (Forest NJ) offers turnkey electrical systems, telecommunications systems, project management services, and electrical engineering solutions to end-users, building owners, and construction companies throughout central and Northern New Jersey. Electrical construction is the foundation of our business, and we take pride in being an industry-leading contractor.

Single-Source for All Your Electrical Construction Needs

As a single-source electrical construction contractor, we can plan, design, install, maintain, renovate, or retrofit just about any electrical system solution clients need, bringing efficiency to projects and streamlining billing processes. We can furnish, install, and maintain virtually any electrical system or combination of building systems for clients in a variety of markets.

Adding Value to Every Project, Every Time

We also offer a number of other value-added services and leverage a variety of delivery models in order to ensure project goals align with your business objectives, including:

- » Project management services
- » Electrical engineering services
- » Prefabrication
- » BIM/CAD Coordination
- » Design-build or design-assists delivery models
- » Guaranteed maximum price contracts
- » Target value design contracts
- » Integrated project delivery
- » Equipment pre-purchasing

Supporting Clients Long After Construction Ends

After installation, we offer preventive maintenance programs, as well as rapid-response mobile services teams, to help ensure you achieve maximum return on your electrical system investment. On call 24/7/365, our staff of electricians and technicians are highly experienced in a variety of electrical systems and equipment.
